BOTANICAL DEPARTMENT,
THE UNIVERSITY,
MANCHESTER 13.

15th November, 1948.

Dear Fisher,

Thank you very much for some reprints from your department which arrived today. Will you be good enough to let me know whether anything is going to appear in print on the lines of your talk to the British Association. I have started some work again on hybrid vigour and we are working on the physiology of hybrid and inbred tomato roots in tissue culture. If you have any proof or typescript you could lend me on the lines of your talk (which I missed because I could not be in Brighton) I should be very grateful; and I would return the document to you promptly.

With good wishes,
Yours sincerely,

Eric Ashby
(Eric Ashby)

Professor R.A. Fisher,
Whittingehame Lodge,
44 Storey's Way,
Cambridge.
