Dear Sir Ronald,

Thank you for your letter suggesting Fraser Roberts as a lecturer for the Darwin symposium for section H at Glasgow. I think he might be a very good choice for a general talk on Darwinism, but we would still like you to give a talk of the biological aspects especially in your own field of Genetics. I hope therefore that you may still agree to give us a talk on the effect of Darwin on ^{the physical} biological aspects of man.

I must apologise for not writing before but I have been in bed with an attack of flu for the past two weeks.

Yours sincerely

J.G. Hurst

Sir Ronald Fisher
Dept. Of Genetics
Cambridge.
