Professor L.L. Cavalli-Sforza
Istituto Sieroterapico Milanese
Serafino Belfanti
Via Darwin, 20 - Milano

C My dear Luca:

Todd sent me on your estimate, and I told him it was cheap at the price, and he ought to get all he can at this rate.

O About the University of Stockholm paper, the editor, Coombe of the Journal of Ecology seemed to want to cut out all the introduction material, which is nonsense. The only hope of stopping people from getting at cross purposes is to consider what they have said and relate it to a wider reference frame. However, perhaps it will come out.

P Over here everyone is making me talk about tobacco and lung cancer.

Love to Maria and all her angels.

Sincerely yours,

Ronald A. Fisher
