

14th June, 1954.

Dear Dr Henningsen,

By some oversight that I cannot understand, I believe I have failed so far to send you an offprint of my paper in Heredity on the variation in strength of the blood group P.

As the data examined were owing exclusively to you, I should be very ungrateful if I did not send at least this token of acknowledgement.

Sincerely yours,

Enc. (1-10/10)
