

Professor R.A.Fisher, F.R.S.,  
Whittingehame Lodge,  
44 Storey's Way,  
Cambridge, England.

Sir,

I have just heard from Dr. Race of your interest in my work on the P-factor. I feel greatly honoured by your interest, and it is a pleasure to forward a reprint of my first paper on P together with a proof-sample of my paper on the heredity which has not been published yet.

I have to admit that the calculations have been made by the slide rule which may account for minor inaccuracies. I should be very grateful to hear if you might have any major objections to the conclusions.

I am yours truly

  
K. Henningsen
