

JOHN INNES HORTICULTURAL INSTITUTION
MOSTYN ROAD, MERTON PARK, LONDON, S.W.19

From the Director, DR C. D. DARLINGTON. L1Bery 3645

26th March 1942.

Dear Professor,

I understand from the University
that you are my co-examiner for dissertation
thesis on selection in flies.

I am going away tomorrow, Friday,
for two weeks & hope that I shall be
able to arrange about the examination on
my return.

I am afraid I forget to answer
one question in your letter about "re-rolls,"
viz what about experiments which might show
some evidence of general selection. I do not
know of any ^{such} experiments having been done
with "re-rolls" though Dely-Berny lists
such experiments involving different pairs allied
to *panaxia obscura*. He, of course, finds evidence

of annual election ~~at~~ between you, &
wms, I believe, of election within Miranda.

I am having notices sent out for a
G.S. Bonnell meeting at the zoo on
April 16th.

Yours sincerely

K. Mathew -
